

EKATERINA ROY

Product Designer

Amsterdam, Netherlands

+31651885158

katyaroy19@gmail.com

linkedin.com/in/ekaterina-roy

I design and ship consumer products end-to-end, from idea to the App Store. I co-founded RunPlan — a structured, watch-first running planner live on iOS & watchOS — and own its design, shipping straight from Figma into code with AI. Earlier, 6+ years in B2B SaaS and e-commerce taught me to turn complex flows into something anyone can use: an HR platform (70+ clients in 5 months) and a first-to-market subscription model.

Experience

Co-Founder & Product Designer at RunPlan, Amsterdam

January 2025 — present

- Co-created a training app for runners as a 2-person indie team;
- Designed end-to-end UX for iOS and watchOS: onboarding, training plan setup, workout tracking, and coaching interface;
- Defined product strategy: privacy-first approach (no accounts, no ads, no data collection), personalized training plans from 5K to half marathon;
- Built and maintain the product website (runplan.app);
- Use AI tools to prototype, configure analytics, and iterate faster.

Independent UX Designer

2022 — 2024

- Relocated to the Netherlands and completed a Professional Diploma in UX Design (UX Design Institute, accredited by Glasgow Caledonian University).
- Took on freelance web design projects alongside studies.

UX/UI Designer at SberKorus, Saint-Petersburg, Russia

May 2020 — January 2022

- Designed and launched the flagship HR e-signature platform —
- as the sole designer in a cross-functional team (PM, product owner, analysts, frontend). 70+ companies and ~1,800 employees onboarded in the first 5 months;
- Ran usability testing that drove a full search redesign — people couldn't find documents they knew existed;
- Reduced UX debt: redesigned components and added the missing mobile guidelines to the design system;
- Shipped 6 products from concept to release;
- Mentored 2 junior designers.

Product Designer at Petshop.ru, Saint-Petersburg, Russia

May 2018 — May 2020

- As part of the product team, I designed the checkout and user education flows for Autoship to introduce a new recurring delivery model to the market. This launch successfully increased overall orders and AOV;

Skills

Product Design, User Experience (UX), User Interface Design(UI), Mobile App Design (iOS / watchOS), Product Strategy, Design Systems, Design-to-Code, Designing with AI, Product Analytics(Firebase, GA4), Figma, Claude Code, XCode

Languages

Education

2023, UX Design Institute, Ireland

Professional Diploma in UX Design

2016-2017, ITMO University, St. Petersburg, Russia

Computer graphics and web-design

2010-2015, Petrozavodsk State University, Petrozavodsk, Russia

Specialist's degree in Energy supply of enterprises

Certifications

2020, Mobile Application Design at the British Higher School of Arts and Design, Moscow

- Collaborated on modernizing the core UI of a legacy e-commerce platform across the entire user journey, from catalog to checkout;
- Designed key functional improvements — such as new payment methods and product availability states — working closely with engineering to ship them;
- Partnered with marketing to create landing pages, 10+ promotional campaigns, and 3+ interactive games for partner brands to drive acquisition and engagement.

Junior designer at RuNetSoft, Saint-Petersburg, Russia

June 2017 — February 2018

- Created design assets for commercial proposals and client presentations;
- Maintained the company's corporate identity guidelines.
